social interaction is of prime importance in daily life especially so at work and for the interpersonal professions originally published in 1994 group performance is an invaluable account of the theory research and practice of work in groups the authors henk wilke and roel meertens examine how tasks are performed in groups and how group achievement can be encouraged they also discuss the best structure for a group in order to achieve optimal results beginning with the performance of the individual and how this is affected by the presence of others the authors analyse the role of cognitive and reflective tuning they then explore how four processes cognitive reflective communicative and structural tuning operate simultaneously in groups they also discuss different approaches to

leadership in relation to the motivation and coordination of group members group performance will be of interest to all professionals whose day to day work depends on effective communication skills and to students and researchers in psychology and communication

climate change is one of society's great challenges the scientific community agrees that human activity is to a large degree responsible for these changes and efforts to promote more sustainable behaviors and lifestyles often backfire people travel for longer distances when driving a vehicle that uses a sustainable energy source they purchase organic food as a means to be environmentally friendly without necessarily reducing other means of consumption and those who deliberately change their behavior to be more environmentally friendly in one area often start behaving environmentally irresponsibly in another environmentally harmful behavior and decision making often have their roots in cognitive biases and cognitive inabilities to properly understand climate change issues to understand the effects of one's own behavior on the environment and other means by which thinking and reasoning about climate change issues are biased
